

Robert F. Kennedy, Jr. for U.S. President in 2024

“My top priority is to end the corrupt merger between state and corporate power that has ruined our economy, shattered the middle class, polluted our landscapes and waters, poisoned our children and robbed us of our values and freedom.”

Kennedy, formerly chairman and chief litigation officer for Children’s Health Defense, is now the organization’s chairman-on-leave. He is an environmental activist and attorney and founder of the Waterkeeper Alliance, the world’s largest clean water advocacy group with more than 300 local Waterkeeper groups, protecting water on six continents.

Time magazine named Kennedy its “Hero for the Planet” for his success in helping New York’s Riverkeeper group lead the fight to restore the Hudson River. The New York City watershed agreement, which Kennedy negotiated on behalf of environmentalists and New York City watershed consumers, is regarded as an international model in stakeholder consensus negotiations and sustainable development.

Kennedy has successfully litigated many cases against corporate polluters, including the landmark victories against Monsanto in 2018 and DuPont in 2019, in the contamination case that inspired the movie “Dark Waters” (2019). He is the author of more than 10 books, including “American Values: Lessons I Learned from My Family” and “The Real Anthony Fauci: Bill Gates, Big Pharma, and the Global War on Democracy and Public Health.”

HONEST GOVERNMENT

A democratic government is supposed to be of, by, and for the people. But government institutions have betrayed our trust. The intelligence agencies spy on our own people. Government and tech platforms conspire to surveil and censor the public. Regulatory agencies have been captured by those they are supposed to regulate: Wall Street controls the SEC. Polluters and extractive industries dominate the EPA and BLM. Pharma controls the CDC, NIH, and FDA. Big Ag controls the USDA. Big Tech has captured the FTC. No wonder trust in government is at all-time lows. It's time to earn it back.

From his long experience and familiarity with systems of power, Robert F. Kennedy, Jr. understands that most people in corporations and government are perfectly decent human beings. They play the game, but a lot of them are fed up with its phoniness, and cynical about the paralysis of the system. They feel trapped in it. Clean government isn't just about removing corrupt individuals. It is about changing a system in which perfectly decent people become agents of corruption without even knowing it.

“The blizzard of misinformation that is now inundating our democracy will end only when the government and the media start telling the truth to Americans.” - Robert F. Kennedy, Jr.

We are going to remake public institutions to serve the public. We will roll back the secrecy and make government transparent. We will protect whistleblowers and prosecute officials who abuse the public trust. We will rein in the lobbyists and slam shut the revolving door that shunts people from government agencies to lucrative positions in the companies they were supposed to regulate, and back again. We will get money out of politics. We will open our institutions to real citizen involvement. We will restore integrity to government.
